

Day 4 AM: corpus
construction

Day 4 AM – Agenda

- How to find and extract corpus data from the web?
- How to use an LLM to transform data and perform "Chat driven development?"
- Live demonstration of chat driven development and data cleaning

How to find data

- [Google Dataset Search](#)
- Twitter's Historical Powertrack: rolls the dice (and starts at US\$5k)
 - [zenodo.org](#) [Twitter datasets](#)
 - Right now, only historical corpora matter
- [GLAM Workbench](#) — Trove API
- [data.gov.au](#) and [data.nsw.gov.au](#)
- [YouTube Data API](#)
- Don't bother with Meta/Facebook
- Reddit is currently uncertain — [pushshift archive](#)
- [Papers With Code](#) text datasets
- [Common Crawl](#)
- Dataverse — [Australian Data Archive](#)
- [Figshare](#), [Dryad](#), [re3data.org](#), [FAIRsharing](#)

State Hansard

- Searched "**nsw state hansard api**"
- Found: parliament.nsw.gov.au/hansard/Hansard-API.aspx
- Quick sanity check "**nsw hansard api python**" (failed)
- Opened GitHub Copilot in VS Code

Factiva RTF

The screenshot displays the Factiva search results page for the query "Artificial Intelligence". The interface includes a search bar at the top with the query "Artificial Intelligence", a "Search" button, and filters for "Source: All Sources" and "Date Range: In the last month". A "Back to Australia" button is visible in the top left.

On the left, the "FILTERS" section shows various categories and their counts: "Dow Jones (2,739)", "All (73,907)", "Publications (47,037)", "Web News (23,885)", "Blogs (2,985)", and "Pictures". Below this is a "DATE" section with a bar chart showing the distribution of results from June 23, 2023, to August 01, 2023. The "COMPANIES" section lists "Screen Actors Gu..." with a count of 2,404.

The main content area shows a list of search results. The first result is titled "Artificial Intelligence" and is from "CE NoticiasFinancieras". The second result is titled "Twitter's 'X' ch..." and is from "Deccan Herald". A "Download" modal is open over the first result, offering options to download in PDF, RTF (selected), Headline Format, Article Format, or Headline, Article and TOC. The modal includes "Download" and "Cancel" buttons.

On the right, the "RELATED CONTENT" section includes "SUGGESTED READING: HEALTHCARE/LIFE SCIENCES" and several article links: "Israeli doctors reveal Netanyahu's chronic heart problem...", "Medical-Record Startup Uses AI, Human Power", "Trade groups demand Ofgem tackle energy brokers...", "Pfizer says tornado greatly damaged warehouse; FDA...", and "Chinese Consumers Pinch Pennies on Staples". A "View All" link is also present.

How to do chat driven development to transform and analyse data?

- Demo with **Claude 4.7 Opus**

Before we end, sticky note feedback

- On the green sticky note, write one thing that went well this session.
- On the red sticky note, write one thing that we can improve on, tomorrow.
